Checking E counter TDC status

Lingling Ma
04/13/12

Have finished checking the Production Run:
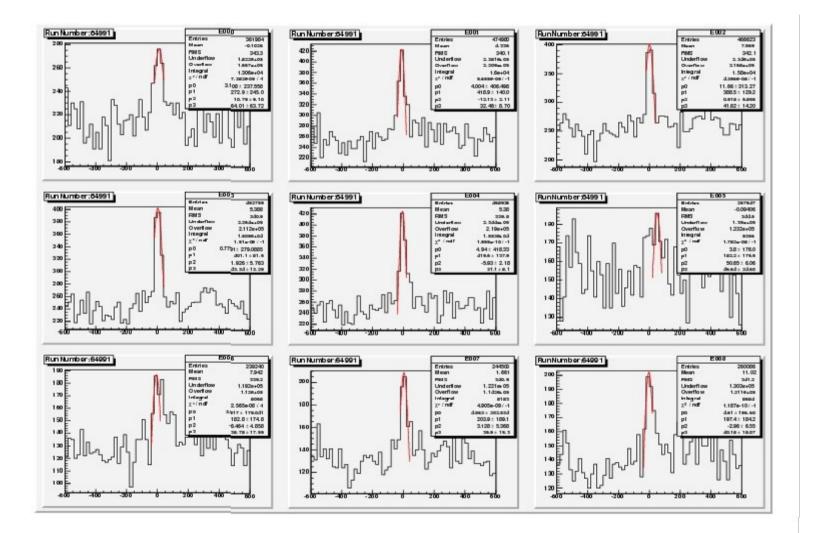

Result: 1)   Eid=59 is normal, Eid=82 is dead.
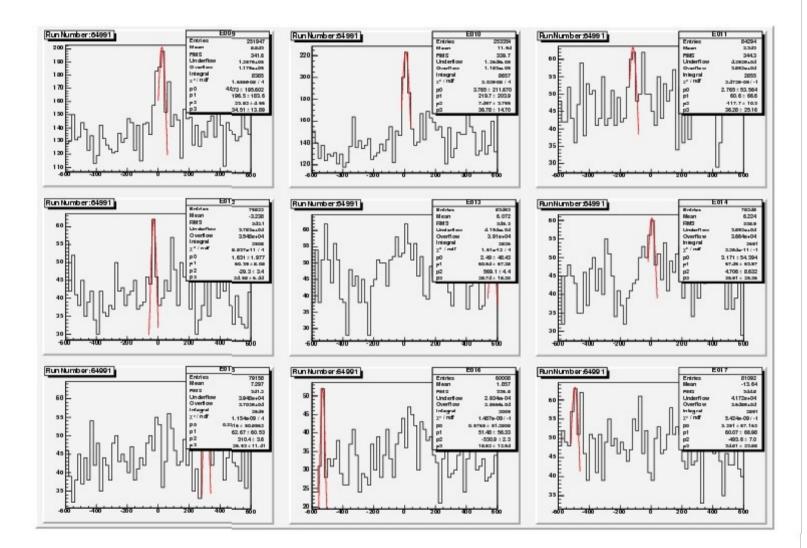

2) There are two peaks at Eid 75-78, the distance is 200 TDC
   counts(19ns).

3) Run Number:64704-64709, are junk.

4) Empty target Production Run: many E counters are normal(no clearly peak for
   TDC difference distribution)

    Run Number:64991-64994, 64998-65005,65065-65074, 65087-65095,

Run:64991(Empty target)

TDC difference between E counters and T counters
